Art Unit 123

Restriction to one of the following distinct and separate inventions is required under 35 U.S.C. 121.

I. Claims 1-30 drawn to compounds, method of use and composition.

II. Claim 31 drawn to process of forming an intermediate.

The intermediate is considered separate and distinct from the final product since other intermediates can be used for the formation of the final product.

Pursuant to telephonic election by Ms. Maghti of I (claims 1-30) with traverse, claim 31 is withdrawn from further consideration by the Examiner as being drawn to non-elected invention, 37 CFR 1.142(b).

Claim 26 is rejected under 35 U.S.C. 112, second paragraph as being an incomplete claim in not reciting the utility for the instant composition.

Claims 1-30 are rejected under 35 U.S.C. 101 as constituting double patenting over the claims of parent patent Serial No. 258,484 which claims encompass the instant claims.

Claims 1-30 are rejected under 35 U.S.C. 103 as being obvious over the Hoefle et al. and Vincent et al. patents. The Vincent et al. patent shows that the instant ring system substituted by sulfur can be expected to have the antihypertensive utility. The Hoefle patent indicates the octahydroindole aminoacyl derivative would have antihypertensive activity. The Vincent et al. patent establishes the equivalence of the ring systems, therefore it is considered that the instant combination of references is proper and renders the claims obvious.
